

Ross Hubble

Running *(fully clothed)* for

Bar Sports and Amenities Officer

Look at your hand; now look back at this poster. Would your hand look better with a nice frosty beer or glass of wine in it? Perhaps a game of table football or pool could relieve you of your work woes? Yes? Of course it would. I am willing and able to act as not only your awesome MCR barman, but as a representative for MCR sports and amenities.

Ross freezing in a boat

My chemical engineering background means I know how alcoholic drinks are made, and know more than is probably healthy about mixing. G&T, Whisky and Coke, and Glucozade Port are just a small selection of my drink mixing repertoire.

I have painstakingly and bravely tested various beers, wines and spirits on myself at numerous formals and several trips to the pub in the name of science, and will gladly help you select some of the finest beverages the MCR bar can offer. I will run the MCR bar after special formals and outside of term for all your drinking needs.

I will help maintain the excellent condition of the MCR, and I aim to get some new mugs, tea spoons and get the pool cues fixed.

I have been involved in sporting activities like lacrosse, rowing and cycling and go to the gym. Honest! See above for photographic proof.

I have become skilled in the art of the coffee machine, and will ensure that your all caffeine needs are always satisfied.

Lots of Love,

Ross
